4. Horizontal Monitor

5. Player's Controls Are:

B-way Joystick

Buttons:

Shoot

Super Weapon

Description:

Warning: All communication from the planet Hubris has been mysteriously cut off! You have been sent to investigate.

Take off into outer space and prepare for battle. Your spacecraft is equipped with 2 side ships that can not be destroyed. You will encounter all types of intergalactic enemy ships on your mission. Dodge their fire, which includes bullets, lasers, time-release bombs, and other deadly shots. You must maneuver through tight mazes, tunnels, around buildings and rockers, to mention just a few of the obstacles you will face. After destroying certain enemies, power-ups can be obtained to help the player in his quest:

- * **Vulcan Bomb**—Speed and number of bullets increases.
- * **Multiple Option**—Extra ships are given. Up to 4 are available for 2 players, in addition to the 2 extras the player already has. These extras can not be destroyed.
- * **Bonus**—Bonus points are awarded.

In addition to these power-ups, the player is also given "Lil' Bables." These are used to nuke all the enemies in front; however, use of Lil' Bables is limited. Your assignment will take you through 7 scenic, challenging stages, ranging from city skylines to the depths of the universe.
